## Internet Security Suite

### 2009

## Quick Start Guide

### Helpful information on Installation and Set-Up

**Check Point**<sup>®</sup>  
SOFTWARE TECHNOLOGIES LTD.

# INSTALLATION AND SETUP IN 3 EASY STEPS:

## STEP 1: INSTALL

The fastest install in the business! 5 minutes, 8 screens and a reboot and ZoneAlarm is installed, pre-configured and ready to protect you.

Installation from the CD:

- 1) Insert the ZoneAlarm® Internet Security Suite CD-ROM into your CD-ROM drive.
- 2) The ZoneAlarm Internet Security Suite startup window will appear.
- 3) Follow the on-screen instructions.

You will have the option to download the latest version of ZoneAlarm Internet Security Suite from the Internet. Downloading from the Internet ensures that your computer has the most up-to-date protection after installation is complete.

If the ZoneAlarm Internet Security Suite startup window does not appear automatically:

- 1) Click **Start** on your Windows desktop
- 2) Click on **My Computer**.
- 3) Click the **ZoneAlarm icon**.

Upgrading from a Previous Version of ZoneAlarm

If you are upgrading from a previous version of another ZoneAlarm product, you can install ZoneAlarm Internet Security Suite without uninstalling the previous version.

During installation you will be asked to select an upgrade option, then click **Next** to continue.

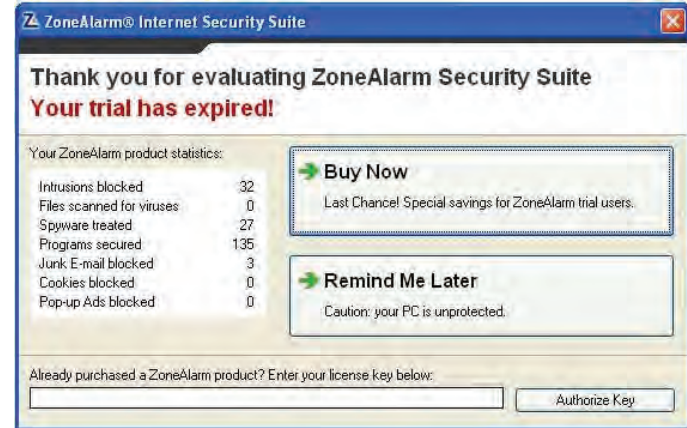

### Upgrade Options:

Upgrade	This option preserves your existing security settings and applies them to the new version. New features that are added during upgrade receive default settings.
Clean Install	This option discards your existing security settings and restores default settings.  This option is recommended if you've been experiencing any problems with your security settings (for example, if you are unable to change a setting, or a setting reverts to a prior state).

## STEP 2: ENTER YOUR LICENSE KEY

After the ZoneAlarm installation process is complete, your computer will reboot.

After reboot, the ZoneAlarm License Wizard will begin. Enter your **license key** and click the **Authorize Key**.

**Where's my License Key?** Your license key is located on the CD sleeve.

## STEP 3: INTERACTIVE SET-UP

ZoneAlarm is set to protect you by default – you don't need to change any settings. During Setup ZoneAlarm will let you choose different security options, but most users should follow the recommendations.

That's it for setup. Your PC is now protected by ZoneAlarm!
